- Let's bring home our own garbage
- Let's stop throwing garbage into the water
- Let's keep our manners on the sea

Safety precautions

- Before using, please read the instruction manual carefully and use it correctly.
- Unreasonable operation shortens product life and may cause engine failure or accident.
- Be sure to perform periodic inspections to prevent engine failures and accidents.

If you have any comments or questions about the product, please contact us through contact_ymia@yanmar.com

• The color of the product printed here may differ slightly from the actual color of products. • Productin photos may include other options. Please check with your deale

DIESEL INBOARD FISHING BOAT
VF23AZ

Fits Your Fishing Style

Defining your real "fishing" experience

"Zarpa" -taken from Spanish for "departure" or "claws".

A spacious and wide cabin with easy to move interior and a number of high-quality fishing functions that allow you to slash the wave and enjoy the scenery while fishing.

By newly adopting a movable cabin door next to the rotary captain seat ,
Zarpa23II makes it possible to fish while maneuvering to explore new ways of fishing.

Zarpa23II has evolved just for that purpose, to give the passionate fisherman more freedom and adventure.

Zarpa ^{サルパ} **23II**

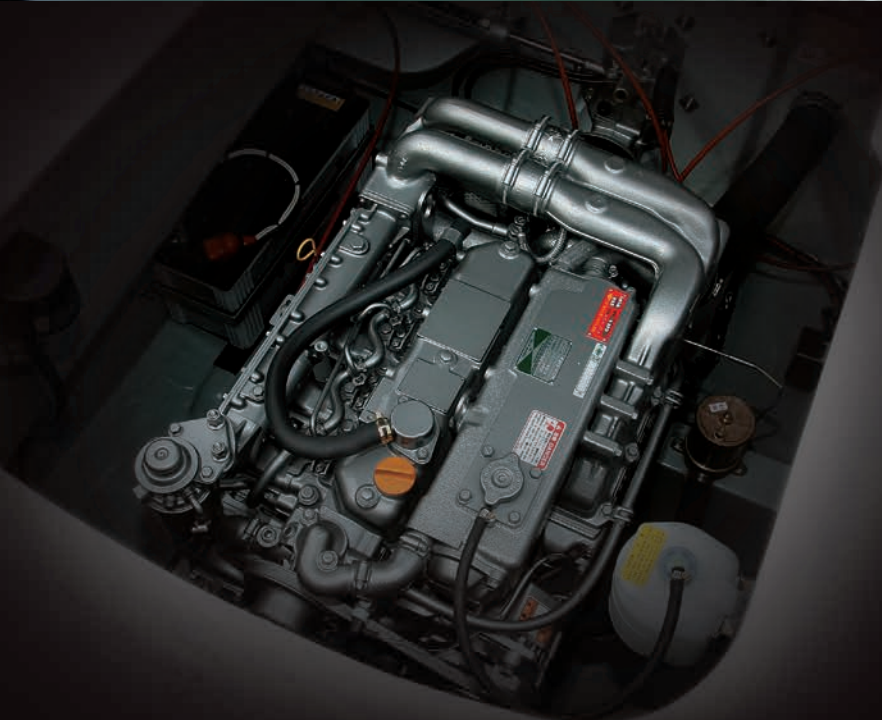

ENGINE & STYLING

The beat of the powerful engine, and the flying figure when running in the sea. Zarpa 23II has the thrust power to split the sea with sophisticated style.

Powerful and economical with the reliable diesel engine. The polished style of Zarpa 23II looks as new and refreshing to boat lovers.

Development and design that makes full use of our own know-how and cutting-edge technology.

For hull design, we make full use of technology that combines "3D-CAD (3D computer-aided design)" and "NC (numerical control) processing" that enables highly accurate combination of molds. Its performance is strictly checked, producing a complete Zarpa 23II for our customers.

Achieves both high power and low fuel consumption.

Direct injection diesel engine

A reliable Yanmar diesel engine with excellent durability. No waste in combustion efficiency from low speed range to high speed range, and stable running is possible and economical. Also, Anti-vibration support is standard equipment to reduce vibration and noise (compared to our old model).

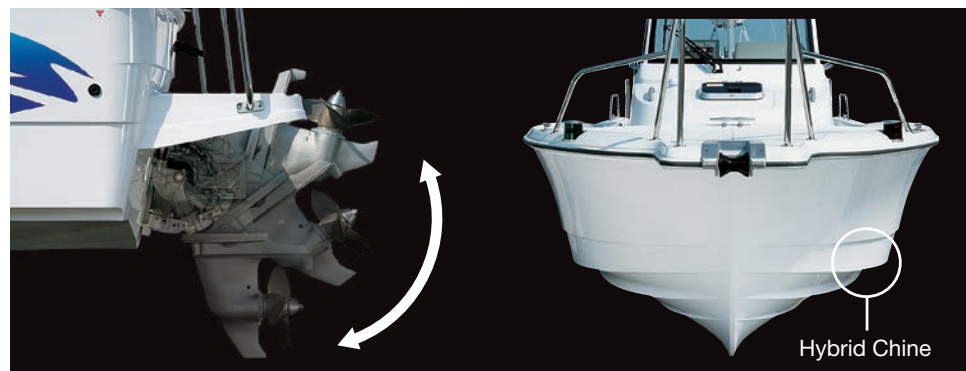

Diesel Engine Advantage

1. The compression ratio can be increased to raise the thermal efficiency and makes lower fuel consumption rate. The fuel consumption rate at partial load is also efficient, creating a superior difference to gasoline engines even when idling.
2. Provides a smooth sail and running performance even during long-distance navigation. Compared to a gasoline engine, it enables steady running with an adventurous sensation of maneuvering.
3. No need for an electric ignition system which sensitive to water and salt, creating a high reliability engine with few failures and excellent startability.
4. By setting a generator in the engine, guarantee a power source for lighting equipment.

4JH3 HTZY1

66.2kW /3850min⁻¹ [90ps/3850rpm]

Compact design for smooth turning and maneuverability

■ Stern Drive

Yanmar's original sterndrive that reduces propulsion resistance to ensure excellent turning and operability. The hydraulic tilt makes mooring and propeller inspection easy.

Compatible with trolling, ideal for slow running.

■ Multi Drive

Yanmar technology makes it possible to install a multi-drive equipped as standard with a trolling device that emphasizes durability and enables fine running in drift fishing. The operability is quiet and smooth.

*Vernier cable throttle system is included for trolling operation

reduces hull resistance with excellent stability.

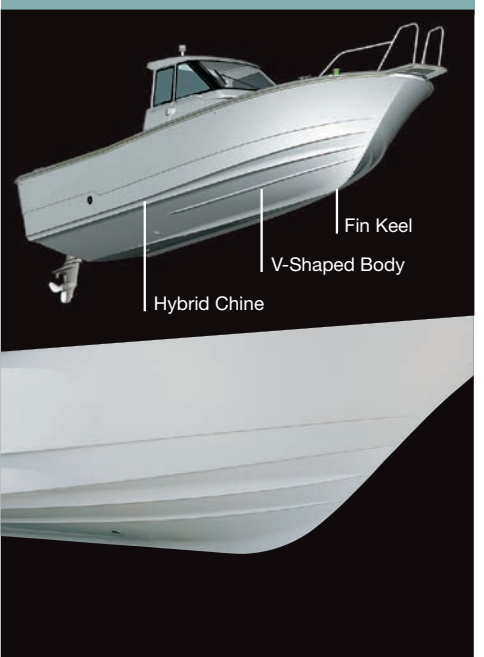

■ Hybrid Chine

Uses hybrid chine that reduces hull resistance and demonstrates excellent stability when running. Enjoy a powerful and refreshing ride.

A high-speed V-type ship with excellent ride comfort and smoother maneuverability

■ Hull

A high-speed V-shaped hull that carry-out outstanding start-up performance combined with the fin keel which has excellent directional stability, cushioning the impact from waves, and preventing horizontal drift to allow it to achieve ideal running speed.

The effectiveness of spanker to reduce the swaying motion caused by wind.

■ Low Profile

A low-line design that suppresses bridges in consideration of air resistance during high-speed driving. Combined with a large fin keel, preventing drifting due to wind.

Enjoy any fishing style you like. Spacious layout with practical design.

Freedom, with fishing and driving at the same time. Contentment, a comfortable space and a variety of easy-to-use functions. Let your heart guide you to your ideal fishing style.

EXTERIOR

■ Bow Deck

For ease of fishing and anchoring, Zarpa 23II is designed to maximize open space on the deck and equipped with a handy bench seat. The deck-integrated bowsprit lets uninterrupted movement on the boat. In addition, the anchor storage has plenty of room for rope and other equipments.

Specifications

Model.....	VF23AZ (Zarpa 23II)	Length×Width×Depth....	7.50m×2.24m×1.12m	Passengers Capacity....	7 people
------------	---------------------	------------------------	-------------------	-------------------------	----------

Engine Specifications

Engine Model	4JH3-HTZY1
Maximum Output	66.2kW/3850min ⁻¹ (90ps/3850rpm)
Rated Output	60.3kW/3700min ⁻¹ (82ps/3700rpm)
Sterndrive	SZ113
Hydraulic Tilt	Standard
Connecting Shaft	CF25-0Z (L=200)
Installation Method	Anti-vibration Support
Mass	1360kg
Steering System	Hydraulic
Remote Controller	Two Handle
Fuel Tank	100L
Battery	115F51×1
PTO	140mm
Propeller	3-14"×17"
